### Standalone Keypad Access Control

# User Manual For PAD Door Entry

Please read the manual carefully before use this unit www.Rickardsecurity.com - 08001216097- Technical Line 077745972235

#### 1. Packing List

Name	Quantity	Remarks
Keypad	1	
User manual	1	
Screw driver	1	Ф20mm×60mm, Special for keypad
Rubber plug	2	Φ6mm×30 mm, used for fixing
Self tapping screws	2	Φ4mm×28 mm, used for fixing
Starscrews	1	Φ3mm×6mm, used for fixing

Please ensure that all the above contents are correct. If any are missing please notify the supplier of the unit.

#### 2. Quick Reference Programming Guide

To enter the programming mode	* Master code #			
	999999 is the default factory master code			
To exit from the programming mode				
Note that to undertake the following pr # e.g to change mater code *9999999	rogramming the master user must be logged in *999999 #0111111#111111#			
To change the master code	New code # New code # The master code can be 6 to 8 digits			
To add a PIN user. 1234 is not permitted for door opening code.	The ID number IP IN II  The ID number is any number between 1 & 2000. The PIN can be any four digits between 0000 & 9999 with the exception of 1234, which is reserved. Users can be added continuously without exiting programming mode			
To add a card user	Read Card #  Cards can be added continuously without exiting programming mode			
To delete a PIN or a card user.	User ID number   for a PIN user or			
To unlock the door for a PIN user	Enter the PIN then press			
To unlock the door for a card user	Present the card			

#### 3. Description

The unit is single door multifunction standalone access controller or a Wiegand output keypad or card reader. It is suitable for mounting either indoor or outdoor in harsh environments. It is housed in a strong, sturdy and vandal proof Zinc Alloy electroplated case which is available in either a bright silver or matt silver finish. The electronics are fully potted so the unit is waterproof and conforms to IP68. This unit supports up to 2000 users in either a Card, 4 digit PIN, or a Card + PIN option. The inbuilt card reader supports 125KHZ EM cards,13.56MHz Mifare cards. The unit has many extra features including lock output current short circuit protection, Wiegand output, and a backlit keypad. These features make the unit an ideal choice for door access not only for small shops and domestic households but also for commercial and industrial applications such as factories, warehouses, laboratories, banks and prisons.

#### 4. Features

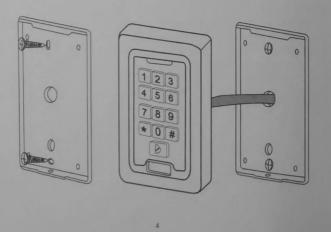

- Waterproof, conforms to IP68
- Strong Zinc Alloy Electroplated anti-vandal case
- Fully programmable from the keypad
- 2000 uses, supports Card, PIN, Card + PIN
- Can be used as a stand alone keypad
- Backlight keys
- Wiegand 26 input for connection to external reader
- Wiegand 26 output for connection to a controller
- Adjustable Door Output time, Alarm time, Door Open time
- Very low power consumption (30mA)
- Fast operating speed, <20ms with 2000 users
- Lock output current short circuit protection
- Easy to install and program
- Built in light dependent resistor (LDR) for anti tamper
- Built in buzzer
- Red, Yellow and Green LEDS display the working status

#### 5. Specifications

Operating Voltage	DC 12V±10%	
User Capacity	2000	
Card Reading Distance	3-6 cm	
Active Current	<60mA	
Idle Current	25±5 mA	
Lock Output Load	Max 3A	
Alarm Output Load	Max 20A	
Operating Temperature	-45°C~60°C	
Operating Humidity	10%- 90% RH	
Waterproof	Conforms to IP68	
Adjustable Door Relay time	0 -99 seconds	
Adjustable Alarm Time	0- 3 minutes	
Wiegand Interface	Wiegand 26 bit	
Wiring Connections	Electric Lock, Exit Button, External Alarm, External reader	

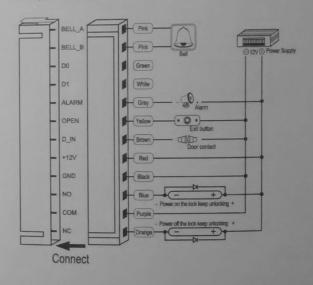

- Installation
   Remove the back cover from the keypad using the supplied special star key driver
   Drill 2 holes on the wall for the Self tapping screws and I hole for the cable
- Put the supplied rubber bungs to into the two holes
- Fix the back cover firmly on the wall with 2 Self tapping screws
- Thread the cable through the cable hole
- Attach the keypad to the back cover.

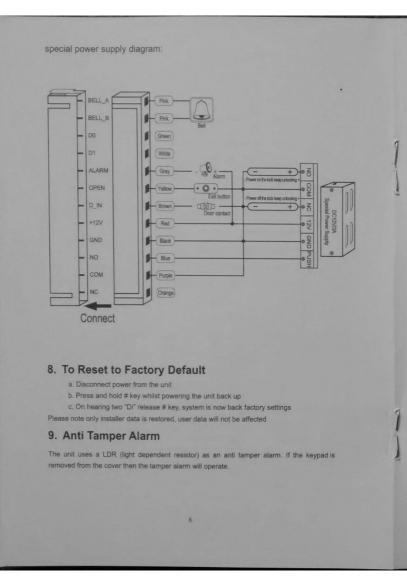

#### 7. Wiring

Colour	Function	Description	
	BELL A	Doorbell input	
Pink	BELL_B	Doorbell input	
Pink	D0	WG output D0	
Green	D1	WG output D1	
100000	ALARM	Alarm negative (alarm positive connected 12 V+)	
Grey	OPEN	Exit button input (the other end connected GND)	
Brown	DIN	Magnetic switch input (the other end connected GND)	
	12V+	12V + DC Regulated Power Input	
Red	GND	12V - DC Regulated Power Input	
Blue	NO	Relay N/O input (Connect positive electric lock "-")	
Purple	COM	Relay COM input, connected to GND	
Orange	NC	Relay N/C input (connect negative electric lock "-")

## 12. The unit operating as a Wiegand Output Reader

In this mode the unit supports a Wiegand 26 bit output so the Wiegand data lines can connected to any controller which supports a Wiegand 26 bit input.
